Threat to your Privacy? - Bring it on!
Your privacy is at stake as someone is after your data. Yes, it happens without your knowledge. If your PC is shared with others, then you risk the security of your private information. When anyone uses your PC, your confidential and private data becomes easily accessible to them. One Click Privacy lets you do away with all unnecessary or unwanted info that might be accessed by others.
Your document history can become a medium for others to access your system's private data including hidden files. Similarly, interne
ne Click Privacy handles all sensitive areas in your system.
